UNIX<sup>®</sup>  
COMPATIBLE

## BUSINESS COMPUTER

### The Commodore 900 Business Computer

Offers the power and expandability that will grow with your business. The Commodore 900 is a multi-tasking, multi-user workstation which out performs machines many times its price. Utilizing the COHERENT<sup>®</sup> (UNIX<sup>®</sup> compatible) Operating System, as many as 8 users can communicate and share this powerful business computer. COHERENT<sup>®</sup> gives the machine full UNIX<sup>®</sup> compatibility so that all the software which has been developed in the multi-user UNIX<sup>®</sup> market can easily be transported to it. Running faster than standard UNIX<sup>®</sup>, COHERENT<sup>®</sup> can support more users, load programs faster and takes up less memory and disk space, making the Commodore 900 the most efficient workstation available.

The Commodore 900 UNIX<sup>®</sup> Compatible Computer System is available in two configurations:

- The powerful UNIX<sup>®</sup> compatible personal workstation with a 1024 x 800 resolution bit-mapped display offering a graphics quality which until now could only be found in machines costing at least 5 times more. This is coupled with Commodore's own window manager with mouse control, which provides a sophisticated but friendly user interface which is fully integrated with the UNIX<sup>®</sup> compatible operating system. Each window offers a full virtual terminal UNIX<sup>®</sup> compatible environment.
- The powerful multi-user UNIX<sup>®</sup> compatible business computer. In this configuration the UNIX<sup>®</sup> compatible operating system provides full multi-tasking, multi-user support which will allow up to 8 terminals, each providing a full UNIX<sup>®</sup> compatible environment. A high performance hard disk of up to 67 megabyte is supported to facilitate multiple users and provide adequate space for application data bases.
